

HLF X16

DUAL POWER ARTICULATED SPIDER LIFT

- Compact stowed dimensions for easy access through small doorways and gates
- Hydraulic outriggers, easy to set up
- Articulated boom with jib for greater versatility
- Proportional controls, smooth and easy to operate
- Simple to maintain

Technical data X16

Max. working height	15.80 m
Max. platform height	13.80 m
Loading capacity	200 Kg
Lateral outreach	6.20 m
Turntable rotation	359°
Size of basket	0.90 x 0.80 x 1.10 m
Overall stowed length	5.16 m
Overall stowed width	0.92 m
Overall stowed height	2.10 m
Climbing ability	30%
Total weight	1.900 Kg
Driving speed	0-1.5 Km/h

Technical specifications X16

Compact design for indoor and outdoor use. Can drive in most tender and rigid ground
Self-leveling platform
Basket and turret operation panel
Hydraulic arms and outrigger interlocks
355° non-continuous turntable rotation
Low ground pressure due to optimal weight dispersal
Dual power sources
Cables and hoses inside the boom
Made of high strength steel
Complete documentation: Operator manual, electronic and hydraulic diagrams
Safety and reliability: Complies with or exceeds all by ISO manufacturing standards, e.g. CE-approval
